INTRODUCTION

Revenue of all city governments during fiscal 1970-71 totaled \$37.4 billion, up \$4.7 billion, or 14.3 percent, from the previous year total.

Total revenue consists of all revenue received from external sources by the city corporations and their dependent municipal agencies, including any city-operated utilities and employee-retirement systems. General revenue--i.e., revenue excluding utility and employee-retirement amounts--was \$30.6 billion in fiscal 1970-71, compared with \$26.6 billion the previous year.

City expenditure totaled \$39.1 billion in 1970-71, as against \$34.2 billion in 1969-70. General expenditure--i.e., spending other than for utility and employee-retirement purposes--totaled \$31.9 billion in 1970-71.

National totals on the finances of cities are presented in tables 1 and 2. Amounts shown pertain to municipal fiscal years which closed within the 12 months ended June 30 of the later year specified.

Table 3 shows a distribution of financial amounts by city size groups, based on the 1970 Census of Population and 1967 Census of Governments.¹ Per capita amounts, by city size groups, appear in table 4.

GENERAL REVENUE

City-imposed taxes yielded \$15.1 billion in fiscal 1970-71 or about half of all general revenue of city governments. Property taxation continued as the predominant revenue source supplying \$10.0 billion. Other municipal tax amounts, as shown in table 1, consisted of approximately \$1.7 billion from general sales and gross receipts taxes, \$1.1 billion from selective sales taxes, and \$2.3 billion from licenses and miscellaneous other taxes.

Municipalities received about \$7.4 billion from State governments in fiscal 1970-71. This, together with lesser sums received directly from the Federal Government and from other local governments (mainly counties), made the total of city

intergovernmental revenue \$9.7 billion, or nearly one-third of general revenue from all sources.

Sources other than taxes and intergovernmental revenue supplied \$5.8 billion of municipal general revenue in fiscal 1970-71. This amount included \$3.6 billion from current charges (other than for utility services, classed separately as utility revenue).

GENERAL EXPENDITURE

As indicated by table 1, education takes a larger share of city expenditure than any other function, even though most of this spending is by the small fraction of municipal governments (including New York City and some other very large units) that directly administer local public schools. In most cities, public schools are administered by independent school districts, for which financial data are not included in this report.

Following is a summary functional distribution of municipal governments' general expenditure in fiscal 1970-71:

Table 1 shows annual functional expenditures for 1970-71 and selected previous years, with distributions indicating capital outlay amounts separately for several major functions.

EXPENDITURE BY CHARACTER AND OBJECT

About two-thirds of all municipal expenditure in fiscal 1970-71 (including amounts for utility, insurance-trust, and general government purposes) was for current operation. Expenditure of this nature amounted to \$26.3 billion.

Capital outlay--mostly for construction, but also including spending for equipment and the purchase of land and existing structures--amounted to \$7.8 billion, or about one-fifth of all municipal expenditures.

Payments of interest on debt (including utility as well as general municipal debt) amounted to \$1.8 billion; insurance benefits and repayments were \$1.2 billion, and intergovernmental expenditure amounted to \$440 million. Cash assistance payments totaled \$1.5 billion.

Expenditure for personal services amounted to \$16.4 billion in fiscal 1970-71, or about 42 percent of all municipal expenditure. Personal service costs are mainly for current operation but include also some amounts for personnel engaged in construction work.

INDEBTEDNESS AND DEBT TRANSACTIONS

At the end of fiscal 1970-71, municipal indebtedness totaled \$49.0 billion, or 11.9 percent more than a year earlier. The debt total included \$24.0 billion of long-term indebtedness pledging the cities' full faith and credit, \$18.2 billion of nonguaranteed long-term debt, and \$6.8 billion of short-term debt.

During fiscal 1970-71, municipalities issued about \$5.3 billion of long-term debt, including more than \$1.1 billion for utility purposes. Their retirement of long-term debt during this fiscal year totaled \$2.5 billion, including more than \$600 million of utility indebtedness.

CASH AND SECURITY HOLDINGS

Financial holdings of municipalities amounted to \$28.8 billion at the end of fiscal 1970-71. Of this sum, \$12.5 billion represented employee-retirement system holdings, \$2.9 billion was held as offsets to long-term debt, \$4.3 billion consisted of the proceeds of bond issues held pending disbursement, \$71 million comprised unemployment compensation balances of Washington, D.C., and

the remaining \$9.1 billion represented holdings of all other city funds, including public trust and investment funds.

CITY UTILITIES AND LIQUOR STORES

Municipal governments commonly operate water supply systems and some of them also operate other utilities--electric power, gas supply, and local transit systems. Financial data for these various types of utilities are shown in table 2. In a few States, certain municipal governments also have liquor store systems. Summary figures for these undertakings appear in table 1.

City utility revenue in fiscal 1970-71 totaled \$5.6 billion, including \$2.4 billion for water supply systems and \$2.1 billion for electric power systems. Utility expenditure amounted to \$5.8 billion, of which \$3.8 billion was for current operation, \$1.5 billion was capital outlay, and the other \$492 million was interest on utility debt.

Municipal indebtedness for utilities at the end of the fiscal year amounted to \$13.1 billion.

FINANCES OF MUNICIPAL EMPLOYEE-RETIREMENT SYSTEMS

Municipal revenue in 1970-71 included employee-retirement revenue of \$1.1 billion, consisting of employee contributions and the earnings on retirement system investments. In addition, these retirement systems received \$1.3 billion of employer contributions from their parent municipalities (including \$22 million of State payments for this purpose).

Benefits and withdrawals paid by municipal retirement systems in 1970-71 totaled \$1.2 billion, and their financial assets at the end of the fiscal year amounted to \$12.5 billion, as shown in table 1.

The foregoing figures pertain only to municipally administered employee-retirement systems. They do not include amounts for State-administered systems--some of which provide coverage for municipal employees--nor for the Federal program of Old Age, Survivors, Disability, and Health Insurance. Employer payments by participating cities to such other retirement programs are included here as a part of municipal general expenditure for current operation.

SIZE GROUP STATISTICS

Financial statistics for various population-size groups of municipal governments appear in tables 3 and 4. Figures for cities of less than 50,000 represent estimates based on a limited sample. Amounts shown for detailed financial

categories are likely to involve a considerable degree of sampling variation.

As will be evident from the functional detail in tables 3 and 4, the relative financial scale of cities in the several size groups is strongly affected by variations in the scope of municipal government responsibilities. In nine of the cities of over 300,000 population, public schools are operated by the municipal corporation rather than by an independent school district, as is commonly the case. Furthermore, 14 of these largest municipalities (including 12 of the 27 cities with more than 500,000 inhabitants) are, in effect, composite city-county governments. Nearly all smaller municipalities, on the other hand, are located in areas which are served by a separate county government.

INDIVIDUAL CITY DATA

Financial statistics for the 405 cities of 50,000 inhabitants or more in 1970 are presented in table 5. The cities are arranged alphabetically by State. Per capita amounts for selected financial items appear in table 6. Any intercity comparisons based upon these figures should be made with caution, and with due recognition of variations that exist among urban areas in the relative role of the municipal corporation, as discussed below under "Coverage and Limitations of Data."

Tables 5 and 6 also supply data for major town and township governments in certain States where such governments are similar to cities in organization and local services provided. These governments can be distinguished from municipalities by the fact that their designation in each instance includes the term "town" (for Connecticut and Massachusetts units) or "township" (for New Jersey and Pennsylvania units). The municipal aggregates presented in tables 1 to 4 however, include no amounts for township (or "town") governments.

Table 7 provides a more detailed array of financial information for each of the 48 municipalities of at least 300,000 inhabitants in 1970. Operating statements for utility systems operated by these city corporations are shown in table 8.

COVERAGE AND LIMITATIONS OF DATA

Data in this report relate only to municipal corporations and their dependent agencies, and do not include amounts for other local governments overlaying city areas. Therefore, expenditure figures for "education" do not include spending by the separate school districts which administer public schools within most municipal areas. Variations in the assignment of governmental responsibility for public assistance, health, hospitals, public housing, and other functions to a

lesser degree, also have an important effect upon reported amounts of city expenditure, revenue, and debt.

The 1970-71 fiscal years reported are those which closed between July 1, 1970 and June 30, 1971. A majority of municipalities end their fiscal years on December 31; the next most common financial period is the 12 months ending June 30.

The sample for this annual survey was designed to yield all-city aggregates which, for selected major items, would be subject to sampling variability of approximately 1 percent; but greater variability is likely to apply to the aggregates for certain financial categories. The amounts given separately for cities of less than 50,000 in table 3 and 4 are subject to relatively high sampling variation. Figures appearing for minor components have been included only to indicate the composition of larger totals.

While the annual all-city aggregates reported in table 1 probably resemble the results of a complete enumeration, interpretation of apparent interyear changes must be made with due allowance for the estimated nature of the data.

RELATED REPORTS

The report from the 1967 Census of Governments, volume 4, No. 4: Finances of Municipalities and Township Governments, presents municipal finance data for fiscal 1966-67 in detail, including figures for size-groups of municipalities, State by State, and figures for municipalities of 10,000 inhabitants or more.

The annual report, Governmental Finances in 1970-71, provides estimated nationwide financial aggregates covering other types of local governments as well as municipalities, together with State and Federal Government data.

SOURCES OF DATA

Information was requested from all municipalities of 25,000 inhabitants or more in 1970, and from a stratified random sample of smaller municipal governments. For the 48 cities with 300,000 inhabitants or more and for a limited number of smaller cities, the basic data were compiled by Census Bureau representatives from official reports and records, with the advice and assistance of local officers and employees. Information for other cities was supplied by local officials in response to a mail canvass that involved the use of detailed census questionnaires. The mail reports were examined intensively, and followup correspondence was used to supplement and verify questionable figures.
